WORKFLOW Complete Workflow to Post Processing:

- Masks
- Layers
- Actions

Escape the Grind of Post Processing!

Professional photographer Joseph Roybal will teach you how to streamline your post processing techniques and unlock the colors and textures your photos are hiding. Joseph will walk you through an assortment of images using Tony Kayper's TK Actions — (purchase separately for the discounted price of \$28). Bring your laptop with the downloaded TK Actions, the latest version of Photoshop CC and Lightroom Classic CC and be prepared to be wowed.

Open: Wildlife

March Rewind

by Donna Dannen

March Evergreen Camera Club Program presented by David Smith

ECC's March program meeting was to have been by Joseph Roybal—Scouting and Preparing for your Photographic Journey: The Photography Field Guide. However, Roybal was unable to give this program at the very last minute. A local photographer, and good friend to many in Evergreen Camera club, David Smith, was recruited to deliver a program instead. David Smith, former owner of the Timberline Gallery, presented a program about the two pronged focus of his work. He first presented a slide show of some of his best known photography which was created by utilizing a photo-merge program

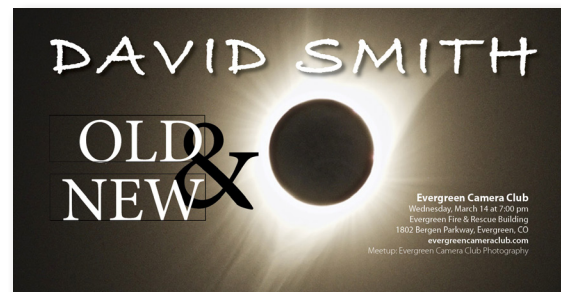

called PT GUI to create large sized photo prints at a time when megapixels were few. His landscapes and nature details were stunning and well appreciated by the audience.

Dave's second slide show was about his current fancy: astrophotography from his back porch, which he dubs "The Dead End Observatory. He showed amazing photos of nebulas and galaxies

taken with his camera and a Celestron telescope. David uses special software to stack the 20 to 30 exposures he takes as he tracks

the movement of the stars and planets. The result is beautiful photos with a touch of mystery of the heavens brought down to our own

limited notion of what lies beyond our daily reality.
